

MADHU CHOWDARY GATTAMANENI

Houston, TX | +1 346-605-9292 | gattamanenimadhu.999@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

OBJECTIVE

Results-driven Data & Business Intelligence Analyst with 2+ years of progressive experience delivering end-to-end analytics solutions that drive measurable business outcomes across supply chain, retail, financial, and healthcare domains. Experienced in SQL, Python, Power BI, Tableau, DAX modeling, data storytelling, and predictive modeling. Experienced in requirements gathering, gap analysis, business process improvement, UAT coordination, and cross-functional stakeholder collaboration to translate complex datasets into actionable insights for senior management. M.S. Data Science candidate, University of Houston – Clear Lake (May 2026). Google Data Analytics Professional certified.

CORE SKILLS & TECHNOLOGIES

Technical Skills

Analytics & BI: Power BI, Power Query, DAX, Data Modeling, Star Schema, Tableau, KPI Reporting, Dashboard Design, Data Visualization, Forecasting, A/B Testing, Business Intelligence (BI)
Data Analysis: SQL, Excel (Pivot Tables, VLOOKUP, XLOOKUP, Power Query, Power Pivot, Macros), Data Cleaning, Data Validation, Data Wrangling, EDA, Statistical Analysis, Regression Analysis, Trend Analysis, Predictive Analytics, Data Storytelling, Data Mining, ETL, Data Warehousing
Programming: Python (Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, TensorFlow), R
Databases & Cloud: PostgreSQL, MySQL, Azure (Fundamentals), Git, Jupyter, VS Code, Google Analytics

Business & Domain Skills

Business Analysis: Requirements Gathering, Functional Specifications, Use Cases, Gap Analysis, Business Process Modeling, UAT (User Acceptance Testing), Stakeholder Communication, Change Management
Domain Expertise: Supply Chain Analytics, Healthcare Data Analytics, Financial Analytics, Retail Analytics, Inventory Management, Demand Planning, Procurement Analytics, Supplier Performance, OTIF Analysis, Clinical Data Analysis, Patient Outcomes, HIPAA Compliance Awareness, Population Health
Soft Skills: Cross-Functional Collaboration, Executive Presentations, Process Improvement, Agile/Scrum, Problem Solving, Attention to Detail, Written & Verbal Communication, Self-starter, Team Player

PROFESSIONAL EXPERIENCE

Business Analytics & Operations Associate | GP Enterprises

Jun 2024 – Present

- Progressed from Associate Data Analyst to Business Analytics & Operations Associate, owning end-to-end reporting for inventory, procurement, and sales operations using Power BI, SQL, and Python; performed data analysis, data cleaning, ETL pipeline design, and statistical analysis on 500K+ records across supply chain and brick product lines.
- Built and maintained Power BI dashboards with DAX modeling and star schema tracking 10+ KPIs including inventory turnover, OTIF, supplier delivery rates, and revenue; replaced manual Excel-based processes, reducing reporting time by 70% and enabling real-time data-driven decision making for cross-functional stakeholders.
- Conducted EDA, regression analysis, and ARIMA time-series forecasting on customer demand trends and seasonal sales patterns to optimize demand planning and procurement decisions, reducing overstock by ~25% and stockout occurrences significantly.
- Gathered business requirements, documented functional specifications, conducted gap analysis, and collaborated with operations, finance, and IT teams to implement reporting enhancements and process improvement solutions.
- Consolidated supplier and procurement data from 3+ disparate sources into centralized data warehouse structures; delivered executive-level presentations translating complex datasets into actionable insights and strategic recommendations for senior management.

Data Science Intern | Corizo

Jan 2024 – May 2024

- Developed and validated ML models using Scikit-Learn to predict stock price movements across 5+ market indices, improving forecast accuracy by ~12% and directly supporting data-driven investment strategy and financial risk analysis decisions.
- Performed end-to-end data cleaning, data wrangling, and feature engineering on 2M+ daily financial records using Python (Pandas, NumPy), reducing data inconsistencies by 30% and improving predictive analytics model performance.
- Implemented time-series analysis using ARIMA and rolling window features; conducted in-depth EDA to surface key price trends and risk indicators, delivering actionable weekly data storytelling reports to 10+ business stakeholders.

PROJECTS

JPMorgan Chase & Co. Quantitative Research Virtual Experience — Forage | June 2026

- Analyzed 10,000 loans to estimate probability of default (PD) using Logistic Regression, Random Forest, and Gradient Boosting classifiers (AUC 0.9998); built an expected loss function ($EL = PD \times LGD \times EAD$) assuming 10% recovery rate.
- Used dynamic programming to optimally convert FICO scores (300–850) into 5 categorical rating buckets by maximizing log-likelihood across 10,000 mortgage records; produced rating map with PD ranging from 4.65% (Rating 5) to 66.11% (Rating 1).
- Built a natural gas price estimator using sinusoidal regression on 4 years of monthly price data, generating continuous daily price estimates with 1-year forward extrapolation for commodity storage contract pricing.

Supply Chain Analytics Dashboard — Power BI & SQL

- Designed end-to-end Power BI supply chain BI dashboard with DAX modeling, star schema, and ETL automation tracking inventory turnover, OTIF, supplier delivery rates, lead times, and logistics KPIs across 6 product categories; reduced reporting time from 3+ hrs to under 30 min/week.
- Identified demand and supply variability patterns through statistical analysis and trend analysis, enabling data-driven procurement decisions and improving inventory planning efficiency for cross-functional stakeholders.

Retail Sales Analytics Dashboard — Power BI

- Built interactive Power BI retail analytics solution processing 12 months of transaction data across 5 regions; designed star schema with DAX measures, replacing manual Excel reporting with real-time executive dashboards supporting A/B testing of promotional strategies.
- Enabled live drill-through analysis at store and SKU level, directly supporting inventory planning, demand forecasting, promotional strategy, and strategic sales decisions at the executive level.

Customer Insights Dashboard — Power BI & Python

- Processed 100K+ customer records using Python (Pandas, Matplotlib) and Power BI; applied RFM segmentation and statistical analysis to identify high-value customer cohorts, repeat purchase behaviors, and demand patterns — methodology applicable to population health analytics and operational analytics.
- Solution adopted into the monthly business intelligence reporting cycle, improving marketing campaign efficiency and enabling faster data-driven operational decision making across sales and marketing teams.

Financial Market Analysis — Python & SQL

- Analyzed time-series data for 20+ equities using SQL and Python, evaluating stock price movements, trading volumes, volatility metrics, and monthly return patterns; built automated ETL data pipelines delivering executive-ready KPI dashboards identifying high-performing stocks and sector risk trends.

Skin Lesion Classification — Deep CNNs | Outstanding Research Award

- Optimized ensemble of DCNNs (VGG16, InceptionResNetV2, InceptionV3, DenseNet201) on HAM10000 clinical dataset achieving 91.48% diagnostic accuracy via transfer learning, data augmentation, class balancing, and hyperparameter tuning; directly applicable to clinical data analysis and patient outcomes improvement; received outstanding research award.

EDUCATION

M.S. Data Science — University of Houston – Clear Lake (GPA: 3.3/4.0)
B.Tech Computer Science Engineering — Vellore Institute of Technology (GPA: 8.0/10.0)

Aug 2024 – May 2026 | Houston, TX
Aug 2020 – May 2024 | India

CERTIFICATIONS

Google Data Analytics Professional Certificate (Coursera) | HackerRank – SQL | HackerRank – Python | Data Analytics with Python — IBM
